Coolest Features

Cello has a wide range of air coolers to keep you cool both indoors and outdoors. A variety of features like the remote controlled digital operations, intelligently designed timer settings, humidity control and an indicator that notifies you when your water level runs low, provide you with uninterrupted cooling. An in-built four way caster wheels allows anyone to move the air cooler around easily from room to room, like a trolley bag!

For refreshing cool air, plug in and start!

Cello Air Coolers involve no installation costs. These air coolers are designed in such a way that they are easy to maintain and rarely require expensive repair and maintenance. The screw-less cooling pad sections are so easy to take out for cleaning that you don’t even need a screwdriver!

Close your eyes and... breathe

Cello Air Cooler draws in air from outdoors, filters it and cools down the temperature indoors in a matter of minutes. Just imagine a cool breeze by the lake that carries cool, refreshing air. Cello Air Coolers work on the same concept of evaporative cooling and refreshes the mind and the body with a cool, soothing breeze.
